Biosketch

Cinzia Perrino is Full Professor of Cardiology at Federico II University of Naples, Italy. Her education in cardiovascular pathophysiology and basic research started before graduation through experiences in molecular basic laboratories at Federico II University. From 2002 to 2005 she was Research Associate at Duke University Medical Center, Durham, NC USA. She has had several relevant roles in Scientific Societies, is currently Past Chair of the Working Group on Cellular Biology of the Heart of the European Society of Cardiology and Past-Chair of the Working Group on Cellular and Molecular Biology of the Heart of the Italian Society of Cardiology. She has received several awards and scientific national and international recognitions, serving in multiple committees of the European Society of Cardiology, including the Congress Program Committee (2016-2018), the Scientific Documents Committee (2022-2024), being invited as speaker at several national and international meetings. Her major research interests are related to the molecular mechanisms underlying cardiac hypertrophy and heart failure, myocardial ischemia and reperfusion, and the crosstalk between gut microbiota composition and the heart. She is author of more than 120 papers published in international peer-reviewed journals (h-index 41; total 5064 citations).
